SUPPLEMENTARY INFORMATION:

A. Solicitation of Public Comment

Written comments and suggestions from the public should address one or more of the following four points:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of

the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

B. Purpose

Federal construction contractors may be required to submit schedules, in the form of a progress chart, showing the order in which the Contractor proposes to perform the work. In accordance with FAR 52.236-15, Schedules for Construction Contracts, the Contractor shall, within five days after work commences on the contract or another period of time determined by the contracting officer, prepare and submit to the contracting officer for approval three copies of a practicable schedule showing the order in which the Contractor proposes to perform the work, and the dates on

which the Contractor contemplates starting and completing the several salient features of the work (including acquiring materials, plants, and equipment).

This information is used to monitor progress under a Federal construction contract when other management approaches for ensuring adequate progress are not used. If the Contractor fails to submit a schedule within the time prescribed, the Contracting Officer may withhold approval of progress payments until the Contractor submits the required schedule.
